Open to Remote / Freelance / Full-Time

CORE TECHNICAL SKILLS

• Frontend: React.js, Next.js, Angular CLI, Redux, HTML5, CSS3, JavaScript (ES6+), TypeScript, Tailwind, Bootstrap

• Backend: Node.js, Express.js, Nest.js, .NET Core (MVC/Web API), C#, PHP, Laravel

• Mobile: React Native, Flutter (iOS & Android)

• AI / ML / DS: Python, TensorFlow, scikit-learn, Pandas, NumPy, Data Analysis, Predictive Modeling, Deep Learning

PROFESSIONAL SUMMARY

Versatile Senior Full-Stack Software Engineer with 2-3 years of experience architecting and delivering scalable web applications, cross-platform mobile apps, and data-driven AI/ML solutions. Deep expertise across the MERN, MEAN, and .NET Core ecosystems, complemented by hands-on work in Python-based Data Science, Machine Learning, and Deep Learning. Proven track record building production-grade platforms — from FoodPanda-style delivery systems with live tracking and Stripe payments to enterprise real-estate portals and predictive analytics models. Passionate about clean architecture, secure authentication (2FA), real-time systems, and turning complex business problems into elegant, high-performance products.

PROFESSIONAL EXPERIENCE

FULL-STACK SOFTWARE ENGINEER ? Yourstechhub.com | Remote | Jan 2026 ? Oct 2026

- Developed and maintained business-focused web platforms, admin dashboards, and customer-facing portals for international clients.
- Worked on ERP/CRM workflows, authentication, data management, and vehicle and maritime records/verification platforms.
- Delivered responsive full-stack features for business operations, record-management workflows, and online service portals.

FULL-STACK .NET DEVELOPER — Out2Sol | Karachi, Pakistan

• Databases: MongoDB, PostgreSQL, MySQL, SQL Server, Firebase

• Integrations: Stripe Payments, Google Maps (Live Tracking/Geolocation), 2FA Authentication, JWT, REST APIs, WebSockets

• Tools/DevOps: Git, GitHub, Docker, CI/CD, Agile/Scrum, Vercel

TOP 3 TECHNOLOGIES

01
Python (AI / ML / Deep Learning / Data Science)

02
MERN Stack (MongoDB · Express · React · Node) & MEAN Stack

03
.NET Core (C# · ASP.NET MVC / Web API · Angular)

EDUCATION

Advanced Software Engineering (3 Years)
Aptech, Pakistan | Mar 2022 – Oct 2025

Intermediate (Pre-Engineering)
PECHS Education Foundation Degree Science College, Karachi | 2020

Matriculation (Science)
Muhammad Ali Jauhar Academy | 2016

- Developed and maintained enterprise web applications using ASP.NET Core (MVC/Web API), C#, SQL Server, and Angular
- Delivered RESTful APIs, optimized database queries, and integrated third-party services

FULL-STACK .NET DEVELOPER — Awesome Technologies Inc. | Karachi, Pakistan

- Built end-to-end .NET Core solutions covering frontend, backend, and database layers
- Collaborated in Agile teams to deliver client projects on time with high code quality

FLAGSHIP PROJECT

VINGO — Full-Stack Food Delivery Platform (MERN)

Production-Ready FoodPanda-Style Ecosystem

A complete, production-ready FoodPanda-style ecosystem with FOUR dedicated dashboards:

Customer App
browse, order, live order tracking

Restaurant Owner
menu & order management

Delivery Boy
real-time order assignment & navigation

Admin Panel
full platform control & analytics

Advanced Features: Stripe Payment Gateway, Live Google Maps tracking, Two-Factor Authentication (2FA), Real-time updates, Role-based access control

MongoDB · Express.js · React · Node.js · Stripe · Google Maps API

Demo: vingo-frontend-zeta.vercel.app

SELECTED PROFESSIONAL PROJECTS

Full-stack web platforms · Business systems · Admin dashboards

CONSULTISER · ERP PLATFORM

Enterprise resource planning platform

Business workspace for organizing core company operations and administrative workflows.

- ERP-oriented workspace
- Administrative access and operational data management
- Business process support

YOURSTECHHUB · COMPANY PLATFORM

Company website and admin portal

Web presence and administrative portal associated with Yourstechhub, supporting company-facing content and operations.

- Company and service presentation
- Administrative portal
- Business-focused web experience

LISA BOT

Bot-focused web application

A dedicated web application with an administrative sign-in for managing the bot-related platform.

- Bot-oriented application
- Admin authentication entry point
- Web-based management interface

VEHICLE RECORDS BUREAU

Vehicle records portal

Online portal focused on vehicle-record lookup and records-related workflows.

- Vehicle records access
- Search and information workflows
- Administrative sign-in

AUTOS CHECK PRO

Vehicle checking platform

Vehicle-check web platform with a dedicated administrative interface.

- Vehicle-check service workflow
- Records and information presentation
- Admin access

SEA HISTORY CHECKS

Marine history checking portal

Portal focused on sea/marine history checks, with a dedicated administrative sign-in.

- Marine history-checking focus
- Online information workflow
- Administrative access

SELECTED PROFESSIONAL PROJECTS

Full-stack web platforms · Business systems · Admin dashboards

MARITIME RECORDS BUREAU

Maritime records portal

Web portal for maritime records and vessel-information related workflows.

- Maritime records focus
- Vessel-information workflows
- Administrative access

CRM SYSTEM

Customer relationship management

CRM application with a super-admin workspace for customer and business workflow management.

- CRM-oriented workspace
- Super-admin access
- Customer/business workflow support

U.S. BOAT REGISTRY

Boat registry portal

Online portal focused on boat registry information and vessel-record related workflows.

- Boat registry focus
- Vessel record information
- Administrative sign-in

VEHICLE INSPECTION CERTIFICATE

Vehicle inspection certificate portal

Web portal associated with vehicle inspection certificates and related record workflows.

- Inspection certificate focus
- Vehicle-related record workflow
- Administrative access

BHOLU FARMS

Farm and dairy brand website

Public-facing website for farm/dairy brand presentation and product or service information.

- Brand and business presentation
- Public-facing web presence
- Product/service information

ACADEMIC PROJECTS (APTECH – ADVANCED SOFTWARE ENGINEERING)

- Semester 1 — E-Commerce Frontend (HTML, CSS, JavaScript)
- Semester 2 — Full-Stack E-Commerce App (PHP / Laravel)
- Semester 3 — Real-Estate Web Platform (.NET Core MVC/API + Angular)
- Semester 4 — E-Commerce Mobile App (React Native + Flutter + Firebase)
- Semester 5 — Fitness Tracker App (Full-Stack MERN)
- Semester 6 — Data Science / ML Capstone (Predictive Modeling in Python)

WHY HIRE ME?

> *"I don't just write code — I build complete, business-ready products. In 2-3 years I've worn every hat: frontend, backend, mobile, database, and AI/ML. That means you hire ONE engineer instead of an entire team. I've already built what most companies dream of — a fully-featured, FoodPanda-grade delivery platform with live tracking, Stripe payments, 2FA security, and four role-based dashboards — end to end, solo."*
